Analysing commit messages

June 12, 2021

1 Introduction

In this paper an effort has been made to analyse commits and gather information on their indended basic operation by looking at the message of the commit. To fullfill on the premise repositories of the top 10 most wanted programming language according to [**so-survey**] have been investigated. To get a more accurate representation of each language, 100000 commits have been chosen. To enhance diversity, each repository is limited to 10000 commits.
